

FieldFlō — Game Plan

William R. Barton
Sr. Product Designer
June 2026

THE CORE REFRAME — SAY IT TO YOURSELF FIRST

"I'm not a product designer learning AI. I'm an AI-native builder who's done the substance of product design for 15 years — under different titles."

AI-native for real

Ship with Claude in hours. The JD's #1 trait — the one others fake.

Clarity from chaos

15 yrs turning messy briefs into clean, usable, opinionated interfaces.

Ownership + action

Freelance = own outcomes end-to-end, no hand-holding. Ship today.

LEAD WITH

- The **Review Tool as a case study** (not a portfolio piece)
- Claude chain: Cowork → Code → GitHub → your design system
- The **AI-UX decisions** you made in it

NEUTRALIZE → PIVOT

- **B2B SaaS:** concede once → AI-native + ramp speed
- **Domain:** fresh-eyes advantage + learning plan
- **Title:** "different labels, same substance"

NEVER

- Claim SaaS experience you don't have
- Over-apologize / list gaps unprompted
- Knock "traditional" designers
- Treat product design as foreign

THE THREE MONEY ANSWERS — REHEARSE THESE COLD

Q · "HAVE YOU DESIGNED FOR AI / PROBABILISTIC SYSTEMS?" ← MOST IMPORTANT

Yes — the Applicant Review Tool.

HIT THESE BEATS: deterministic score **vs** labeled AI read · confidence/uncertainty shown · fails honestly when the model's unreachable · human-in-the-loop "Ask" box. → "Exactly your JD's decisions — how suggestions are presented, how uncertainty is communicated, where humans stay in the loop. Made them, on something live."

Q · "YOU DON'T HAVE B2B SAAS. TWO YEARS IS REQUIRED."

Concede in one line, then trade up.

"I won't pretend the two years is there." → compliance/IR-heavy work at Humble & Fume (risk isn't abstract) → **ramp in days, own outcomes** → "I'd rather show you I'm productive in week one than claim a credential I don't have."

Q · "HOW DO YOU ACTUALLY USE AI IN YOUR WORKFLOW TODAY?"

Be operational, not vague.

Concept in **Cowork** → build with **Claude Code** → version in **GitHub** → refine to your **design system**. Tool: idea → live in hours. "AI isn't a step in my process — it's the medium I design in. A first-class teammate, like you said."

DO BEFORE THE CALL

1. **Fix LinkedIn** — add Claude, the Tool (featured+link), GitHub. Highest leverage.
2. **Rehearse the Tool walkthrough** (the money answer).
3. **Send the Tool** as your "AI-augmented piece." Confirm live link works.
4. **90 min domain homework** — abatement/OSHA, fieldflo.com.
5. **Optional:** mock one AI-suggestion screen + offer a live exercise.

ASK THEM

- "How do you want to split the AI-augmented surface vs the traditional surface?"
- "What does 'visibly more productive because of AI' look like in month one?"
- "Where's the product most fragmented — my fastest visible impact?"

NOT A GAP

- **Location:** Chattanooga is eligible. Don't raise it.

THE CLOSE — HAVE IT READY

"I know I'm not the conventional pick. But you want someone who already treats AI as a teammate and ships with a bias to action. That's not a skill I'm promising to develop — it's how I work. Give me a real FieldFlō workflow and I'll show you in an afternoon."
